Connect achieves ISO27001 accreditation

Connect Internet Solutions Ltd is delighted to announce that we have attained the most widely recognised security standard accreditation in the world - **ISO 27001:2005, Information Security Management System (opens new window)** certification for our dedicated hosting services.

ISO27001 comprises 10 detailed control disciplines including information security policy, security organisation, asset classification controls, personnel security, physical security, communication management, access controls, system deployment, continuity planning and compliance.

As Colin Charlton, CEO explains: "This accreditation demonstrates our commitment as a managed services provider to giving our clients the very highest standards of security. We are delighted with this success and the significant benefits that it brings to our customers and ourselves."
