## Prestigious win with DfT

Connect Internet Solutions has won a prestigious contract with the **Department for Transport (opens new window)**. The Department were looking for a web-enabled document management system for the dissemination of data related to high value procurement projects. All project-related information such as plans, documentation, specifications etc will be made available to selected suppliers through a DMS-based extranet.

Connect's winning solution is **PeoplePoint (opens new window)** document management system – one of the modules in our successful PeoplePoint online business management suite of tools.

The PeoplePoint DMS is intended to support the re-franchising of the specific rail franchises.

Colin Charlton from Connect commented "We are thrilled to have been selected by DfT, and our efforts now are concentrated on implementing the solution for their next franchise replacement.
