## Connect to produce new website for Smokefree Northwest & Partners

Connect have been successful in their bid to develop the Illicit Tobacco North website. Commissioned by Smokefree Northwest on behalf of the partners involved, the Tackling Illicit Tobacco for Better Health programme aims to reduce the amount of smuggled, bootlegged and counterfeit cigarettes available throughout Northern England. To assist with this programme, the partners recognise the need for effective communication and partner engagement and have recruited Connect to deliver a website that will assist in the achievement of those aims.

The site will be designed for the primary audience of professionals working for the partners. The system will provide resource libraries, events information, news and media and will also include secure areas to allow parts of the site to be accessible only via login.

The client has a very short timescale and we anticipate the go live of the completed site to take place before the end of the summer.
